SUMMARY

Full-stack web developer passionate about transforming precise logical syntax into meaning and ideas, especially for client-side interactivity. Leverages expertise in higher education to streamline development and generate unique solutions. Quick to grasp new technologies, meticulous and detail-oriented, excellent communicator and presenter.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, JSON, XML, SQL

Front-end technologies: React, jQuery, Bootstrap, Materialize, jQuery UI, AJAX, Chrome dev tools

Back-end technologies: Node, Express, MongoDB, Mongoose, MySQL, Sequelize, Firebase, Git Bash

SAMPLE OF APPLICATIONS BUILT

VIRTUAL BACKLOG \ DEMO: virtualbacklog.herokuapp.com \ **CODE:** github.com/jwkeena/virtual-backlog

- Create a virtual representation of your videogame collection in animated 3D.
- Register a secure, personal account; add games manually or by barcode; sort by system, title, and custom tags.
- Core responsibilities: UI/UX, authentication, routing, server, database, API calls, barcode scanner.
- Tools and languages used: React, JavaScript, HTML5, CSS3, Bootstrap, Node, Mongoose, MongoDB.

C.S. LEWIS LETTER SEARCH \ DEMO: jwkeena.github.io/csl-letters \ **CODE:** github.com/jwkeena/csl-letters

- A mobile-responsive custom search engine to quickly and efficiently sift through Lewis's 3,208 letters.
- Tools and languages used: jQuery, JavaScript, HTML5, CSS3, Materialize, XML, RegEx.

SUPER COIN COLLECTOR \ DEMO: jwkeena.github.io/super-coin-collector \ **CODE:** github.com/jwkeena/super-coin-collector

- An arithmetic game that implements custom animation, collision detection, and graphic design.
- Tools and languages used: jQuery, JavaScript, HTML5, CSS3, jQuery UI.

REACT MEMORY GAME \ DEMO: jwkeena.github.io/react-memory-game \ **CODE:** github.com/jwkeena/react-memory-game

- See if you can remember my whole tech stack, because apparently I can't. This game is harder than it looks.
- Tools and languages used: React, JavaScript, HTML5, CSS3, Bootstrap, react-animations
